Five StarsBy Deborah NicholsI love to color and this book is great0 of 0 people found the following review helpful. modern and fun.By Deborah G.Edgy, modern and fun.18 of 18 people found the following review helpful. The art work is detailed, imaginative and original. The dragons are covered in scales but the backgrounds are very detailedBy Jackie CooperThis coloring book is the perfect addition to my Teen grandchildren's coloring library. It is not always easy to find coloring books for my older grandsons. This book is just that and my granddaughters like this book too. This is only the second dragon coloring book that I have found with enough detail to keep them coloring, they love the dragons and the intricate patterns and designs keep them inspired, coloring and away from the TV.Most of these illustrations are duplicated on 2 pages in mirror images and the

background patterns go into and through the binding. This is actually nice, you still get 62 different 2 page illustrations to color, or the way most are set up you can use them as single page images with doubles. This book is perfect for me and a grandchild to color the same picture at the same time for special family time. The art work is detailed, imaginative and original. Most of the dragons are covered in scales but the backgrounds are made up of intricate patterns. 1. 124 pages to color, printed front and back of each page but this book is different many of the images are double paged with the image duplicated, open the book and you find mirror images of the same illustration or a smaller version, printed on heavy weight, bright white paper. 2. The alcohol based markers I tried, Sharpies and Bic both bleed through the pages enough to ruin the picture on the back of the page you are coloring. I just place a couple pages of paper under the page I am coloring to prevent damage to the next page. 3. The water based markers I tried did not bleed through the paper or leave shadowing on the back side of the page and these included Triplus Fineliners and Fibre tip, Tombow dual brush tip, and the inexpensive Proart 100 marker set. 3. When I use colored pencils with this book, I place my chipboard clip board under the page to prevent indentations to the next page. 4. All images fill each page from edge to edge and into the binding I still remove individual pages for my grandchildren, I use a box cutter, ruler and cardboard under the page) most of the images that go into the binding are background patterns. 5. Most of the images have small details so I use Colored pencils, Gel pens, or ultra fine markers for coloring In this book. 6. I am adding images to help you decide if this book is just right for you. 7. This is a wonderful book for school aged boys who love to color detailed designs and adults who enjoy coloring dragons, I purchased this to color with my older grandsons and this is only the 2nd dragon book I have found that is detailed enough to keep my older grandchildren inspired..
