ReviewingThisAfter receiving I decided against giving it to the 4 year-old I'd purchased it for. I was expecting more planets, but it included a lot of abstract images. Otherwise the physical quality of the book is VERY HIGH. Looks nice. Pages not flimsy. Probably more appropriate for older adults or teens who are into mandalas and using colored pencils.0 of 1 people found the following review helpful. Learning with funBy BonnieA different coloring book to teach a bit with the fun.

With more than 35 magnificent images of outer space from NASA, this coloring book will capture the imagination of anyone interested in science, astronomy, and space exploration. Each spread features a full-color photograph from NASA's archives to inspire coloring on the adjacent page.
