This won't disappoint people who have been around academics.0 of 0 people found the following review helpful. Cute bookBy ELARKI bought this as a gift for an engineering student. I think he is enjoying it. I thumbed through it briefly before wrapping for gift-giving and I found the cartoons quite amusing.5 of 5 people found the following review helpful. Science is too important to take seriously.By wiredweirdMaybe that's why Springer-Verlag published these cartoons. Springer (parent company of Copernicus) is generally known for highly technical books, and clearly felt that Harris' comics are a valued contribution.Science is just another human endeavor, so it's full of humans. That means it's basically irrational at the bottom, just like the people that work in science. It looks as if Harris has devoted his life to reminding us that clear, consistent results come from silly, self-contradictory people. His cartoons tease scientists, but

always with affection. That's why so many people in the sciences like his work, and even make it their own. If you already know Harris' work, you're sure to like this. If you're not already a Harris fan, this book will fix that for you.

Sidney Harris, acclaimed Dean of Scientific Humor, presents his most recent collection of cartoons. No scientific or technical topic is safe from the scope of his humor. Harris's cartoons have appeared in *American Scientist*, *Playboy*, *The New Yorker*, *Discover*, and *Science*, among many other popular magazines. Previous collections include *Einstein Simplified*, "You Want Proof? Ill Give You Proof," and *From Personal Ads to Cloning Labs*. "The humor in science that is most widely laughed at comes from nonscientists, like the cartoonist, Sidney Harris." **NEW YORK TIMES BOOK REVIEW**

From the Back Cover No scientific topic is safe from Sidney Harris's pen. Harris's insightful cartoons, which grace bulletin boards and laboratory doors everywhere, have become every person's window into the often baffling and weirdly funny side of science and scientists. Harris's cartoons have appeared in publications as diverse as *The New Yorker*, *Science*, *Discover*, *Saturday*, *American Scientist*, *Playboy*, and *Punch*. Harris is a treasure. -- *American Scientist* Harris's brand of humor appeals to people of all professions and all walks of life. -- *American Humor* The humor in science that is most widely laughed at comes from nonscientists, like the cartoonist, Sidney Harris. -- *New York Times Book*
