Alex Boese : Electrified Sheep: Glass-eating Scientists, Nuking the Moon, and More Bizarre Experiments before purchasing it in order to gage whether or not it would be worth my time, and all praised Electrified Sheep: Glass-eating Scientists, Nuking the Moon, and More Bizarre Experiments:

3 of 3 people found the following review helpful. Funny, Disgusting, FascinatingBy NewspeakThis book. Oh, this book. This book is a roller-coaster ride of unique and true science experiments. There are parts that made me laugh out loud (as a quiet introvert, that is really saying something). There are parts that made me turn white and almost puke. Some parts are painful to read. Others are absolutely fascinating. I couldn't put it down when I checked it out from the

library, and now I bought it to read it again. 1 of 1 people found the following review helpful. **YOU NEED THIS BOOK!** By Taylor Wilson Showed up before delivery date :) It is used but in perfect condition! I love this author, his style of writing keeps you from putting the book down 1 of 1 people found the following review helpful. Loved the book By V. Mariano I loved this book, I read "Elephants on Acid" a few years ago and have been waiting on a "sequel" ever since. Boese captivates the mind with his portrayal of the epic and bizarre but oh so very true scientific history! A great read for the scientifically curious.

The Pig Who Survived an Atomic Bomb The Psychologist Who Hid Beneath Beds The Founding Father Who Delivered Mouth-to-Mouth . . . to a Chicken Welcome to some of the most weird and wonderful experiments ever conducted in the name of science. Alex Boese's *Electrified Sheep* is packed with eccentric characters, irrational obsessions, and extreme experiments. Watch as scientists attempt to nuke the moon, wince at the doctor who performs a self-appendectomy, and catch the faint whiff of singed wool from an electrified sheep.

"Packed with enough material to challenge any would-be science-fiction writer, and proves truth in a lab coat is stranger than fiction." ?The Saturday Evening Post "Boese, a historian of science, once again takes readers on a romp through some of the weirder detours on the road to scientific progress." ?The Boston Globe "Delves into the extremes some will reach for the sake of science. . . . Boese reveals just how far some will go to appease their empirical curiosities." ?Pittsburgh Post-Gazette "Electrified Sheep quite brilliantly explains some of the more bizarre experiments performed in the name of scientific discovery with lashings of intellectual humour and a surprising amount of quality storytelling." ?Chemistry World (UK) "A strangely compelling look at some of the bizarre, outlandish and peculiar experiments that have been attempted in the name of science." ?Penny Le Couteur, coauthor of *Napoleon's Buttons: How 17 Molecules Changed History* "Perfect summertime reading--preferably with a friend nearby who can be constantly interrupted with unsettling facts." ?The Daily Mail (UK) "Laugh-out-loud funny." ?Publishers Weekly About the Author Alex Boese holds an M.A. in the history of science from the University of California, San Diego. He is the author of *Elephants on Acid* and *Hippo Eats Dwarf* and the creator of MuseumofHoaxes.com. He lives near San Diego, California. Excerpt. © Reprinted by permission.
