I noticed it at a bookstore while on a trip but didn't want more thing to carry, so bought it off and it kept me thoroughly amused for at least an hour perusing it!! Great gag gift or just a fantastic book to leave out for guests to unexpectedly stumble upon while visiting me.0 of 0 people found the following review helpful. Intelligent humor is not extinctBy Bob CohenThis book proves that smart, humorous writing is alive and well. And, while the writing would be highly entertaining on its own, the illustrations only take it to the next level. I LOL'd several times. And speaking of rare species, I'm so glad this was produced as a real book instead of a blog.0 of 0 people found the following review helpful. In the proud tradition of the Center for Failimological Research, an illustrated field guide to animals who've become extinct—for good reason—including the Bipolar Bear, Neapolitan Zebra, and Combover Eagle. Before there was Darwin, before there was man's best friend, there were . . . Failimals. The Royal Failimal Society presents the

Unchameleon, Bipolar Bear, Emo Emu, and other Darwin-defiant animals that, though fascinating, have clearly become extinct for a reason. The culmination of years of research, study, and observation across each continent and every era, *Extinct for a Reason* is the definitive field guide to the hows, whys, and whats of Failimals and Evolosers. With colorful illustrations and vital information on everything from mating habits to defense mechanisms, this book is a must-have for any species considering undergoing the evolutionary process. Learn how to avoid common mistakes, such as: Alienating oneself from one's peers (see: Goth Sloth) Refusing to admit one's genes are improperly sized (see: Muffintopotamus) Having dangerously high levels of charisma (see: Elvisaurus) Weeded out but still proud, the curious creatures collected within serve as a warning to ambitious animals everywhere: Evolve with Caution.

"Most awesome book about animals ever! Suck it Rudyard Kipling!" (David Bickel, author of *Creepiosity*)
