Richard Benson : F in Exams: The Very Best Totally Wrong Test Answers before purchasing it in order to gage whether or not it would be worth my time, and all praised F in Exams: The Very Best Totally Wrong Test Answers:

32 of 33 people found the following review helpful. Jay Leno was rightBy eSpartyRemember that Leno segment, where he quizzed people in public places - usually on some history or geography trivia? And how it was at once amusing and embarrassing to watch them fail miserably at the most basic of questions? Well, turns out those people, in their formative years, were the students featured in this book. And they were all very funny then.This book is a gem, or rather a collection of gems. I recommend not reading it in one sitting, but flipping to a random page or two and getting your laughs. Guaranteed to elevate the crabbiest of moods, this book is a coffee-table essential, and can really get a dinner party going.The banana car has definitely come to represent this book, but I assure you that the book is

replete with even funnier examples. Just to whet your appetite, from the "Business and Technology" section: Q: What happens during a census? A: During the census a man goes from door to door and increases the population. I am very glad I bought this book, and very regretful that I did not become a federal census bureau employee. 3 of 3 people found the following review helpful. Very funny By The Schultz This book cracks me up. Although, the intelligent part of me is telling me that it's all fake and the same person/two people wrote all of those responses to the questions using various "handwriting" fonts to add the answers - especially since you can see the same ones repeated over and over and over again, I try to block that out and believe it's real. When I manage to do that, it is really funny. 73 of 77 people found the following review helpful. Laughed so hard, I cried By Suzanne Jackson I purchased this book because my school is currently going through the madness of state exams. I thought it would be a nice book to share with the faculty to relieve some of their test-associated stress. I am sure they will enjoy it because there were many "laugh out loud" moments. One example from the book had me in tears as I tried to read it to a family member (mostly because I couldn't get through it without bursting into laughter). I would recommend reading this book in small doses. A page or two, here and there, to lighten your mood. Otherwise it does get a bit repetitious. The book also would make one think about test question creation. Some of the questions are so poorly worded the snarky student answer is almost expected. I would highly recommend this book to any teacher.

"F" stands for "funny" in this perfect gift for students or anyone who has ever had to struggle through a test and needs a good laugh. Celebrating the creative side of failure in a way we can all relate to, F in Exams gathers the most hilarious and inventive test answers provided by students who, faced with a question they have no hope of getting right, decide to have a little fun instead. Whether in science (Q: What is the highest frequency noise that a human can register? A: Mariah Carey), the humanities (Q: What did Mahatma Gandhi and Genghis Khan have in common? A: Unusual names), math, or other subjects, these 250 entries prove that while everyone enjoys the spectacle of failure, it's even sweeter to see a FAIL turn into a WIN.

"It's instant comic relief." Daily Glow About the Author Richard Benson is the author of several humor books. He lives in London.
