Five Stars By Customer Beautiful art, I love her work!

Fairy Coloring Book in Grayscale is filled with 26 pages to color. Grayscale means all the range from black to white and everything in between - not black and white line art. This gives you the opportunity to learn about shading and create a very in depth piece. This book is printed on bright white paper (a bit heavier paper than my other books). The pages have a nice smooth finish. Colored pencils, markers, and other mediums work well with this paper. Also included in the back are four of my full color images! Use them for reference or feel free to take them out of the book to hang on your wall! Have fun!
