He was just a few months old at the time, and is now going on five years old. He and his baby sister LOVE this book! After five years at the hands of small children, this book is definitely showing wear - a couple of the buttons stick or only work some of the time, the pages are peeling in places, the sounds are certainly not as robust and crisp as they used to be. New batteries may fix that problem (as far as I know, they've never changed the batteries), but it's held up very well! And really, after five years of being manhandled by sticky children, no book is going to look spectacular. My sister has purchased a couple of the other books like this because of how much her kids liked this one.0 of 0 people found the following review helpful. HilariousBy aconnerGave this as a 3 year old birthday present for my nephew. He loved it and so did his mom. They were cracking up. The sounds are hilarious. The pages are nice and thick too. Almost like a board book but full size and lots of words on each page.0 of 0 people found the following

review helpful. Nephews New Favorite Book By J.D. I purchased this book as a gift for my 6 month old nephew. The book arrived as described and in perfect, functional condition. I checked each button to make sure they pressed easily and played as they should. The volume is reasonable, not too loud that it would disturb a baby but definitely loud enough to be heard by anyone in the room. This book is purely for entertainment value of course, as the varying sounds emitted by the different animals isn't exactly intended to educate the reader. The construction of the book is simple coated cardboard so there is not much variance in textures for the reader to receive much sensory stimulation, however, my nephew is fascinated with each page and grabs at the book with each page turned and giggles, eyes wide with interest, as each sound is played. I give this product 5 stars for its quality in construction and functionality (I cannot vouch for the longevity of the battery as it is still working as it should at this time) as well as the overall satisfaction of the intended recipient. If my nephew is happy, then this book is a success as far as I am concerned! I would recommend this item for small children as it is amusing and funny, yet tasteful (as much as flatulence can be).

NOTE: "If the audio does not play, you may need to replace the batteries" From tiny bubble-popping goldfish toots to thunderously loud elephant gas, learn how to spot the funniest (and smelliest) farts in the animal kingdom! Hilarious tidbits identify the odor, range, frequency, and aftereffects of ten different types of gassy expulsions, while the attached battery-powered fart machine reproduces each emanation with astounding accuracy. This is pure, unbridled entertainment for the giggling child in all of us. Let 'er rip!

About the Author H.W. Smeldit has been a worldwide authority on farts, farting, and badminton for nearly 40 years. He has penned hundreds of fartological books, essays, bumper stickers, jingles, and limericks. Jared Chapman was born in Louisiana, grew up in Texas, went to college in Georgia, and now lives in Austin. He has worked for Walt Disney Television Animation, Nick Jr., and Hallmark.
