praised Fifteen Grades of Hay: A novelette of love, lust and sheep (Studies in Macroeconomic History):

A novelette about love, lust and sheep. When Dolly the sheep (not the one that was cloned) falls for the talented Derek the Weathersheep on her farm, she thinks her world is complete. That's until the arrival of a handsome Spanish lad, Juan the Lovesheep. Dolly falls helplessly for the continental arrival and has to battle her conscience. Can she balance having two men in her life at the same time? Who's going to get hurt? An erotic sheep-based novelette from a leading author of sheep-based fiction in Wales.
