By Jay Ballenger You can't read this book like it's a story. But it's a great way to remember who the characters are, and maybe even how to spell some of their names. The pictures, large and small but always colorful, are abundant.

Disney/Pixar Studios, the vanguard film production company responsible for the revolution in computer generated

animation, brings us its latest creation in Finding Nemo. This underwater adventure stars a shy clownfish on a mission to save his son, Nemo, who has been taken from their home in the coral reef. DK and Pixar have teamed up again to bring animation fans an essential visual guide to the film, detailing the creative process behind the scenes and showing readers everything they might want to know about the characters, story, imagery, and magic of the next hit family film from the creators of Monsters, Inc., Toy Story, Toy Story 2, and A Bug's Life.
