From Automatic Press / VIP : Formal Philosophy before purchasing it in order to gauge whether or not it would be worth my time, and all praised Formal Philosophy:

Formal Philosophy is a collection of short interviews based on 5 questions presented to some of the most influential and prominent scholars in formal philosophy.

From the Inside Flap This is a fabulous collection. Hendricks and Symons have performed an important service to the entire philosophical community. The interviews are not only rewarding in and of themselves but they will help the reader understand what has been going on and has been achieved in the past fifty years. - Ernie Lepore, Rutgers

From the Back Cover Why do you do philosophy that way? Do you believe all philosophy could be done that way? Do you think it should be done that way? These are questions one seldom asks, except perhaps at dinner. Yet there is a lot one could learn from the answers, especially when they come from philosophers who do have a distinguished way of doing their job. Formal Philosophy identifies one such way and collects the answers of its eminent practitioners - not the quick answers one might give over an *entrecôte*, but the answers one gives when seriously prompted to reflect upon their daily profession. An enticing, provocative, completely novel way of surveying the landscape of contemporary philosophy. - Achille Varzi, Columbia University

About the Author Vincent F. Hendricks is Professor of Epistemology, Logic and Methodology and member of IIP - Institut Internationale de Philosophie. He is the author of many books including *Mainstream and Formal Epistemology*, *The Convergence of Scientific Knowledge*, *Feisty Fragments*, *Logical Lyrics* and *500 CC: Computer Citations*. Other books include *Self-Reference*, *Proof Theory*, *Probability Theory and Knowledge Contributors*. Editor of *Synthese* and *Synthese Library* he is also the founder of PHILOG - The Network for Philosophical Logic and Its Applications. John Symons teaches philosophy at the University of Texas at El Paso and is an associate member of l'Institut d'Histoire et de Philosophie des Sciences et des Techniques, Universitet de Paris 1. In addition to numerous articles, he is the author of two books on Daniel Dennett's philosophy, *On Dennett* and *Daniel Dennett: Le Naturalisme en Chantier*. Other books include *Quantifiers*, *Questions and Quantum Physics: Essays on the Philosophy of Jaakko Hintikka* and *Logic, Epistemology and the Unity of Science*. Symons has edited *Synthese* and *Synthese Library* since 2002 and has represented Ireland in the Institut Internationale de Philosophie since 2004.
