the tone and research of the videos. I also used this book's information to wow my family while we were watching Jeopardy! Thanks, Charlie!0 of 0 people found the following review helpful. much more satisfied and a good readBy James Edward Ford 3Seen this at barnes had to check , much more satisfied and a good read.0 of 0 people found the following review helpful. Perfection :DBy Kkitty2000Love Charlie's book and his videos so much, left a review on Books-a-million :)

Welcome, fellow humans (and others), to the the world of FUN SCIENCE! I'm Charlie, also known across the internet as charlieissocoollike. In my book, I'll be taking you on an awesome journey through the cosmos, beginning with the Big Bang through to the Solar System and the origins of life on Earth, all the way down to the particles that make up everything around us (including you and me!). Expect frequent digressions, tons of illustrations of not-so-sciencey things (NB a microwave flying through space), and pages packed with my all time favorite mind-bending science facts. So, get ready for a faster-than-the-speed-of-light (OK, not quite) tour of all of the best and most interesting things that science has to offer us... and most importantly: WELCOME TO THE UNIVERSE! (Written by a Science Fan NOT at scientist!)

"it's easy to be carried along by the jokes only to realize several pages in that you're learning a ton. A science lover will like this, but a lot of readers will become science lovers after starting here." - BookPage About the Author Charlie McDonnell began vlogging in 2013 under the handle Charlieissocoollike and was the first vlogger to reach 1 million YouTube subscribers.
