**Strobe Witherspoon : furtl** before purchasing it in order to gage whether or not it would be worth my time, and all praised furtl:

Strobe might just be the reincarnation of Nostradamus because I can definitely see some of this happening in the future. This grim future where Nickelback is revered as the greatest band of all time and elitists hunt dolphins for sport. This allegorical nightmare that is already beginning in small ways evidenced by the virtual reality world people live on in Facebook and the ubiquitous image of everyone staring at their phones. 4 of 4 people found the following review helpful. A good first effort which could use a little polishing. By the phantom tollbooth Given that this book was self-published and is being sold for \$1, it definitely represents excellent value for money. That said, although I enjoyed the book, it seemed as if the author was trying too hard to satirize everything about modern culture at the same time. The book could have used a little more discipline and focus, and definitely could have been improved had the author sought the advice of a professional editor to help them refine the plot. 0 of 0 people found the following review helpful. Surprise five start By BerLinda Was recommended this book by a buddy who is great at finding off the radar books. Was not initially too into the idea, I tend not to get into dystopian literature, but once I got started was very hooked. The story felt less like a picture of a dystopian future than an incisive and chilling satire of our own society today. The book feels almost like a secret handshake that lets you in on the secrets of the world around you, playing out in plain sight but invisible to those who do not bother to see it. As I told my grandmother after finishing it, this book breathes life into the old saying, "just because you are paranoid does not mean your tinfoil hat is not beneficial." Manny, Muffin Top, Osgood, Wainright, and Eyore are all characters that will long stay with me.

1984 meets Idiocracy meets the 2016 US Presidential election KIRKUS REVIEWS BEST OF THE YEAR SELECTION "In a dumbed-down, dystopic near-future America, high-tech tycoon Manny Kahn fights to save the nation from political pathologies brought about by his own creation, a ubiquitous online search engine...Witherspoon keeps the narrative as lean as an iPad and resists the gimmick of writing the thing in text-message shorthand. Though characterizations are often tweet-deep, the nonstop invention and wit spare neither the left nor the right. Sharp-toothed and Bluetoothed--gigabyte-size political and social satire for the wired generation." KIRKUS REVIEWS
