I decided to check for a better price, though, and I found one here! The book contains some of our favorite geeky actors and it has become a favorite coffee table book that always gets comments from our guests. Although we may disagree a little with some of what is said, it's an adorable book that will delight any fangirl! 2 of 4 people found the following review helpful. 'Geek' is the new black By O. Neeson I saw this book on another online store called Mod Cloth (mainly a clothing store), and I knew straight away from glancing at the cover that I had to have it! And after I signed up with , it was the first thing I bought. Filled with all my favourite geeks (young and old-er), I was gawking from start to finish, and I have gone back and looked through it a few times. There are a few surprises in here with the selection of some possibly unlikely geeks, but I love them all the same. I was especially happy to find my two favourite dreamboats, John Cusack and Edward Norton. 5 stars 1 of 1 people found the following review helpful. Lisa the Nerd's Review By Lisa Schensted in a sentence or so: a silly celebration of geeky celebs. from Will Arnett to Mos Def to Michael Cera to Daniel Radcliffe, this book takes a

look at your favorite geeky celebs and gives them a little shout out. each geeky dreamboat has their picture, some geek nuggets (birthday, fun facts, favorite things, etc) and then a little bio explaining why the authors chose to put them in the celebration of nerdish hotties. the two funny female authors sum up the purpose of this book so much better than i could hope to with this blurb from the introduction: "Sure, some of these cuties may appear a little dreamier than geeky, or a little geekier than dreamy, but remember, the prevailing theme here is the beautiful and poetic combination that makes up the sexy nerd." in the style of a teeny-bopper magazine, this is a fabulous idea for that nerd lover in your life, for a coffee table book, or just to add to your geekish repertoire. seriously, it's high comedy and awesome. check it out! my personal fave geeky dreamboat mentioned in the book: Simon Pegg (duh). "He fights zombies. And zombie killers are rad! Simon is like a big zombie-fighting teddy bear that makes us laugh in a time of crisis. The fact that he loves Star Wars, The X-Files, and zombies may make him the poster child of geeks, but he's still a dreamboat. When we watched Shaun of the Dead, we realized that when zombies take over the world, there's no one we'd rather have defending us than Simon Pegg. On top of that, he has one quality that blinds all women - a British accent." (68) title: Geeky Dreamboats: A Celebration authors: Sarah O'Brien Lacey Soslow genre: Humor publisher: Quirk
