Barbara Crotts : Gemini Cricket: John Glenn - First Person to Orbit the Earth before purchasing it in order to gage whether or not it would be worth my time, and all praised Gemini Cricket: John Glenn - First Person to Orbit the Earth:

This book is an accurate account of John Glenn's first flight in space with an imaginative overlay of a cricket who gets into humorous situations. This book should particularly appeal to a child between the ages of about 8-11 who likes science and has humor and imaginative bent.

About the Author Barbara Crofts has been an elementary school teacher for over 30 years. She has her MS in Education and a strong interest in Science. She has had poetry for children and adults published in newspapers, magazines and a book Looking at Hearts.
