**Terri Branson : Geodoodles** before purchasing it in order to gage whether or not it would be worth my time, and all praised Geodoodles:

Calming influence for anyone--but especially autistic child!By Suzi TaylorMy teenaged daughter is on the autism spectrum and needs time to destress herself from the pressures of school every day when she gets home. This book has been a large part of this work since we obtained in a few weeks ago. She loves the intricate designs and lets the methodical coloring bring her back to her "home" world. We love the new trend for adult coloring time, and this book is a perfect example of what's good about it!1 of 1 people found the following review helpful. Worth every penny!By CustomerExcellent! Who would think, as an adult, I would like to color? Not me... Received this as a gift and much to my surprise coloring these geometric designs is addictive. If you like to doodle, this takes it to another level. Can't wait for the next one!0 of 0 people found the following review helpful. A fun way to relaxBy Paula B. GorgasWhat a fun new way to relax--while watching TV or just because! I'd been wanting to try my hand at this new coloring fad, and Terri Branson's "Geodoodles" was perfect. Interesting as well as

intricate, her geometric designs stimulate the mind even as the colors and repetitious motions allow relaxation. All-around good fun.

Challenge the mind with sixty original and complex geometric designs to color using pencils, markers, or any desired medium. Each geodoodle is created to reveal surprising layers and stunning visual effects when completed. [Adult Coloring Book (rated G for all ages) from Dragonfly Publishing, Inc.]

About the Author Terri Branson is an author, an editor, and a graphics artist. After earning an associate degree in math and science, she turned to the studies of creative writing and graphic design. Awards include the EPPIE 2005 Best Children's Book Award for BROTHER DRAGON and the EPPIE 2004 Best Anthology Award for the science fiction and fantasy collection COSMIC SCULPTURE. Publications include science fiction and romance novels, adult coloring books, and many children's picture books. Terri lives in Oklahoma with her husband David.
