Almost perfect By Christine27106 Wik's books are always great...although since this is my third one, I have some bones to pick: a) the paper is much thinner and there is some bleed through when you use felt tip pens, b) the pages are not perforated as were the previous ones and c) there are less pages and some have patterns repeated from a previous book. Still, I'd buy anything Mr. Wik puts out...they are just plain the most fun. 3 of 3 people found the following review helpful. GeoPattern 2 by John Wik By amicosempre Another great book by John Wik who makes some great colouring books for adults and really anyone of

any age who likes to color. For some there may be too much detail but for others it is just right. These designs are great for taking one's time to color as they can be done in whatever manner the person completing them wants them to be done in colors used and ways they are used on each design. They are a great way of passing the time and also expressing oneself through colors. He has many different books with different designs so one should be able to find some designs they truly love to color. 0 of 0 people found the following review helpful.
