I love the designs and details in the drawings. They are fun to color and give a person something to do as well as a way to express themselves through the use of colors in each design and how the colors are applied. There are no wrong ways to color a design as each belongs to the person completing the design. Some take awhile to complete and some not as much but the it makes for a fun past time to when it has been completed there is a sense of satisfaction and a piece of artwork to enjoy. We may not all be able to draw and create patterns and designs but we can enjoy the talent of others and what they

come up with. 0 of 0 people found the following review helpful. Wanted To Like By quilt girl I was extremely disappointed to receive this book. I have several other books by this designer and love them. This one however, doesn't qualify as a book. It's a bunch of run-off papers bound together. I thought I would be receiving clear copies. Unfortunately many of these designs are blurry, as if run off on a bad copy machine. They are full of black dots and lines that are smeared. It would cost more than it's worth to send it back, so I won't. The designs themselves are great, but their presentation is poor and not up to 's normal standards. 0 of 0 people found the following review helpful. Five Stars By Customer All was great

This special edition contains 40 designs from GeoPattern and GeoPattern 2 that have been reformatted to have larger spaces and slightly thicker lines. 20 patterns were carefully selected from each of the first two GeoPattern books. Each of the chosen designs was then scaled up and given a border for a more traditional coloring appearance. The idea was to zoom in on the most detailed patterns in order to provide a series of designs for colorists who like the style of these books, but prefer their designs a little less detailed than those offered in GeoPattern and GeoPattern 2. Each Pattern is printed on one side of the paper for convenient coloring!
