John H Hacker : Getting Older Is Not for Wimps before purchasing it in order to gage whether or not it would be worth my time, and all praised Getting Older Is Not for Wimps:

0 of 0 people found the following review helpful. Getting Older is for WimpsBy Elizabeth V. CodyMarvelous, I couldn't put it down. When I reached the end of the book, I wanted it to continue. I did laugh! Very Amusing! A terrific sense of humor! It will make a special gift!I do hope John Hacker will write a second book!Elizabeth Cody0 of 0 people found the following review helpful. Old stuff and bad GrammarBy j.carlsonMost of the writing is old stuff

that has been bandied about for years by just about everyone. Some is very crude and has no place in a book such as this. The Grammar is bad and there are frequent misspellings. Not worth purchasing. 0 of 0 people found the following review helpful. An old grandmother who needed to laugh. By Old grandmother I read the book and laughed from the first page to the last and I am still laughing "Getting older is not for wimps" I will also give it to my son and his family to read and enjoy and then give it back to me so I can keep it.

This book is a humorous look at the various aspects of growing older. Growing older is mandatory, growing up is optional. Children: A younger friend of mine told me that he believed that life begins when your last child leaves home and takes the dog with him. He has so much to learn. Grandchildren: Grandchildren are God's reward for not killing your own children. Marriage: I love being married. It's great to find that one special person to annoy for the rest of your life. Doctors: If you go to the doctor and tell him your left arm hurts and he can't figure out why, he'll say it is just old age. I don't buy that because my right arm is just as old and it doesn't hurt.

About the Author John H. Hacker has been a Civil Engineer with his own firm for over forty years. The family works for the firm. The firm has devoted many hours of pro bono work for various non-profit organizations, both here and in various foreign countries. He received the Angel Network Award from Oprah for his work with Habitat for Humanity. In addition the firm has won several national awards for its Engineering projects. He, with his daughter Julie, authored the book "Residential Steel Design and Construction" published by McGraw Hill.
