If Oprah Still Had A Book Club - This Should Be On The List!By Becky PartingtonI knew Diane before her accident and she always had a gift of teaching and public speaking, but believe me, her TBI has only enhanced her abilities to communicate. I know it was because of her hard work and determination. This is a MUST READ for ANYONE going through a life crisis - ANYONE who is a care giver - ANYONE who felt like giving up but needed that little nudge to keep on keeping on! If Oprah still had a book club, I would personally send her a copy of this book. I am going to order several as gifts for people who are hurting and need a little lift.2 of 2 people found the following review helpful. What an Experience!By AnneMaybe because I know Diane Personally and could be somewhat prejudice, this book is a must for those that are dealing with traumatic brain injury or are caretakers for someone who has had TBI. Diane had me from the first sentence - until the end. It is very well written - for the every day person to read and understand. From the beginning to her continued recovery. Loved it!!0 of 0 people found the following review helpful. Great read for all.By Clay HicksI saw her as she stood on the doorstep of death and celebrate her life and this book of triumph. Well written book that taught me that just because they fixed all the broken parts, the brain heals at it own pace.Clay Hicks
