**Norine Dworkin-McDaniel, Jessica Ziegler : Science of Parenthood: Thoroughly Unscientific Explanations for Utterly Baffling Parenting Situations** before purchasing it in order to gage whether or not it would be worth my time, and all praised Science of Parenthood: Thoroughly Unscientific Explanations for Utterly Baffling Parenting Situations:

1 of 1 people found the following review helpful. Five Things I learned from the Science of Parenthood book.By EPMHere are a few of the things I learned from reading Science of Parenthood:1. It is very likely that I have Persistent Volunteer Stress Disorder (p.63)2. We have a high concentration of the element Dramatium in my house (p.118)3. The science behind the mystery of Quantum Carpool Mechanics (p.152)4. A the proper use of the lever-fulcrum in our morning routine (p.167)5. If the Find-My-Former-Self App isn't a thing, it should be (p.181)This book is the ultimate baby shower, new parent, repeat parent, parent of tweens and teens, parent on the verge, parent with a sense of humor book. It is also great to give to grandparents who would enjoy a chuckle over the good old days. Highly recommend.1 of 1 people found the following review helpful. Clever comedy paired with hilarious illustrations.By E. R. CatalanoSharp writing and hilarious illustrations, this dynamic duo behind Science of Parenthood hits it out of the

park. Perfect gifts for parents. The book's 4 parts---biology, chemistry, physics, and math---together add up to a smart and very entertaining read. 1 of 1 people found the following review helpful. Finally a Parenting Book That Really Tells it Like It Is! By Kathy Radigan As a mom of three I have to say that this book not only had me laughing, it also had me shaking my head in agreement. These ladies know form where they are speaking. This would make such a great gift for a new or expecting parents!

Based on Norine Dworkin-McDaniel and Jessica Ziegler's popular illustrated humor blog, *Science of Parenthood: Thoroughly Unscientific Explanations for Utterly Baffling Parenting Situations* takes the duo's mix of high-brow science and low-brow humor to a whole new level. Using their trademark brand of quirky, witty humor, and bolstered by their signature cartoons, Dworkin-McDaniel and Ziegler dig deep into the core sciences?biology, chemistry, physics and mathematics?to help moms and dads everywhere solve for "y." As in, "Y" is my child doing that . . . that . . . THING? And please, dear lord, is there a way to make them stop!? Anyone who's ever wondered why the kid who plays Minecraft for hours can't sit still for ten damn minutes to finish a math worksheet; who's marveled at how their toddler always picks the most inopportune moment to poop; or who's despaired of ever showering, sleeping, or finding a moment's peace again will find this book a hilarious, enlightening, and relatable read.

"Science of Parenthood's insights and humor are absolutely amazing!"—Dr. Mehmet Oz, host of *The Dr. Oz Show* "Adapt or die. Those are pretty much the only two real choices a person has once they become a parent, because, you know, the only things we know for sure about this life is that it changes and it ends. *Science of Parenthood* supplies parents with a heap of what is necessary to adapt and adapt some more (and keep adapting more after each adaptation): HUMOR. If you don't laugh, you'll die. No, I didn't mean to say cry, because obviously there is a lot of crying in life. And poop. If you don't laugh your way through this emotionally and physically messy-filled world of family life, you won't survive it. So...if you don't want to die, you had better buy this book." —Nicole Kane Knepper, author of *Moms Who Drink and Swear* "Science of Parenthood is laugh-out-loud funny in a totally non-daunting format. (Sorry, every other unread book on my night stand!) If there's a parent around who doesn't love it, I don't want to know them." —Jill Smokler, *New York Times* best-selling author of *Confessions of a Scary Mommy* "If only this book had existed before I had kids! If you're one of the lucky ones who can get your hands on *Science of Parenthood* before your baby is born, it should be #1 on your wish list, before bassinets and burp cloths and those freakish contraptions that let you suck the snot out of their noses. And if you already have kids, get this book for the laughs and the assurance that yes, the crazy, ridiculous miracle you've been going through is all happening exactly as it's supposed to." —Jerry Mahoney, author of *Mommy Man: How I Went From Mild-Mannered Geek to Gay Superdad* "In *Science of Parenthood*, Norine Dworkin-McDaniel and Jessica Ziegler deliver an awesome combination of hilarity and insight. It's the book *Madame Curie* and *Erma Bombeck* would have written together if only they'd been BFFs." —Johanna Stein, author of *How Not To Calm a Child On a Plane ... And Other Lessons in Parenting from a Highly Questionable Source* "Norine Dworkin-McDaniel and Jessica Ziegler educate and entertain. They are like the *Bill Nye* and *Neil deGrasse Tyson* of parenting... minus the fancy neckties." —David Vienna, author of *Calm The F\*ck Down: The Only Parenting Technique You'll Ever Need* "For these two ladies, parenting IS a science. Luckily they put plenty humor with it, so the class clowns like me can actually understand just what the heck they're talking about!" —Jen Mann, *NYT* best-selling author of *People I Want to Punch in the Throat: Competitive Crafters, Drop Off Despots, and Other Suburban Scourges* "Hysterical, informative, and therapeutic." —Jason Good, author of *Rock, Meet Window* "Move over *What to Expect When You're Expecting*, *Science of Parenthood* has the real truth about the joys, challenges, and completely unpredictable moments of parenting. Equal parts totally relatable, honestly accurate, and laugh-out-loud funny, *The Science of Parenthood* is a must read for anyone who has ever given birth, is pregnant, or is even thinking of having a baby (and if this last one is you, good luck, you'll need it)." —Tracy Beckerman, author of *Lost in Suburbia: A Momoir. How I Got Pregnant, Lost Myself, and Got My Cool Back in the New Jersey Suburbs* "A hysterically funny compilation of witty insights about the trials and tribulations for parenting, ideal for relieving stress through laughter. Highly recommended . . . for personal mirth or as a cheerful gift book." —Midwest Book About the Author Norine Dworkin-McDaniel is the co-creator and principle writer behind the popular illustrated math- and science-based humor blog *Science of Parenthood*, named one of *Parenting.com*'s "blogs every parent should read." A longtime magazine writer, Dworkin-McDaniel's articles and essays have appeared in *Parents*, *American Baby*, *More*, *Redbook*, *Marie Claire*, *Good Housekeeping*, *Woman's Day*, *Food Wine*, *Prevention*, *Readers Digest*, *Fitness*, *Shape*, *Family Circle*, and numerous daily newspapers and newsweeklies. You can find her humor writing in several anthologies, including *Have Milk Will Travel: Adventures in Breastfeeding*. Jessica Ziegler is *Science of Parenthood*'s co-creator, illustrator, web designer and contributing writer. In her "off hours," she is director of social web design for *Vestor Logic* and the writer and illustrator of the customizable children's book series *StoryTots*. Her illustration work has appeared in *The Hartford Advocate*, *Las Vegas Life Magazine*, and *Las Vegas Weekly*, as well as online at [VEGAS.com](http://VEGAS.com).
