This book is a little pg.1 of 1 people found the following review helpful. Historical MemoriesBy Susan DineenI loved laughing at the mommy scenerios creatively shared by moms. I specifically related to the one written by the book's author Beth Friedman as she related how she was sent away by her

OB several times before the real day arrived! I will never forget being told I had "Braxton Hicks," a term I had never heard before. I left the hospital, already 4 days late, feeling I had some kind of curse or other scary condition! I only wish the book had been available years ago! I knew that with contributions from several of my favorite mom-bloggers, I would enjoy the book. I didn't know I would laugh so hard, identify so much with the authors, or wipe a few tears away as they shared poignant, funny, and--often--meaningful moments from their busy and blessed lives. I write and read a lot of motherhood books, and I'm pretty hard to please. I can honestly say this book is very well-done, and I highly recommend it. It's got its edgy moments, and more than a bit of sarcasm, but sometimes, on a bad day, you need to know you're not the only one that wants at least a temporary reprieve from motherhood. Once in a while, you've got to bring on the snark to save your sanity! :) Seriously, if you like to laugh and enjoy hearing mom stories, buy See Mom Run. You won't be sorry.
