Debra Lee Baldwin : Sensational Succulents: An Adult Coloring Book of Amazing Shapes and Magical Patterns before purchasing it in order to gauge whether or not it would be worth my time, and all praised Sensational Succulents: An Adult Coloring Book of Amazing Shapes and Magical Patterns:

2 of 2 people found the following review helpful. Beautiful pictures, but not a good book for coloringBy Christina N.I love succulents and I love coloring books, so I was really excited to get this. Unfortunately as beautiful as the illustrations inside the book are, this is just not great for coloring. The binding of the book is thick and rigid, which makes it impossible to lay the book down flat as you are coloring without the book closing on itself. Even if you could lay the book flat to color, a lot of the images go right up to the very edge of the binding of the book, so it would be impossible to finish coloring most of the pages unless you removed the page from the book with a razor. The images were definitely curated beautifully, it just really isn't a practical book for actual coloring, unless you were to remove each page before you colored it, which defeats the purpose of a coloring book for me.1 of 1 people found the following review helpful. Very nice. Plenty of pages.By TalguyBought it as a gift for my wife the cactus and succulent

nut who also happens to be an artist. I'll let her write from here. I found this book to be very generous in the amount of pages given to exercise your creativity upon. Nice touch that they included the Latin names. This was not an annoyance to me but a help when it came to succulents. No matter how much you love plants, I know very few people who have every name memorized or who can recall what every plant's coloration and texture is supposed to look like. I grow far more cacti than succulents. If you do not know what the plant is supposed to look like color wise you can see a variety of images simply by checking the Latin name. The images will help guide you when you select colors and embark upon your creative endeavor so you can create a realistic picture. If you don't care and just want to 'color' than the images within the book will provide you plenty of opportunity and variety to do just that. I gave it 4 stars because there was no brief blurb of information or explanation about the plant it's self or about physical characteristics. Then again it is a coloring book. I'm one of the few people that probably use these for educational as well as relaxing and artistic exercises. Overall very good and if you like succulents I don't think you will be disappointed if you already know what colors to use or don't mind referring to the computer for visual aids. 3 of 3 people found the following review helpful. Buy yours today!!!! By Larissa Haney I can't imagine a better coloring book to start coloring again! It is absolutely lovely, each picture perfectly detailed. She, Debra Lee Baldwin even has a website where you can look at photos of the actual plants that inspired the illustrations, as a color focused person, that was an amazing discovery. Don't delay in getting yourself a copy or two!

Color your own succulent garden! Sensational Succulents brings together two sweet and popular trends: coloring for adults and succulents. Featuring 75 illustrations drawn by Laura Serra and based on photographs from Debra Lee Baldwin's bestselling books, it is filled with a huge array of succulents, the relaxing patterns that naturally occur in the plant world, fun mandalas made up of plants, and hours of restorative, creative fun. The illustrations appear on only one side of a high-quality paper that supports a variety of mediums, including pencils and markers.

"Sensational Succulents is based on the photographs of Debra Lee Baldwin from her best-selling books. Artist Laura Serra translated them into illustrations that celebrate the intricate patterns of the plant world. As rainy-day activities go, this one's hard to beat." —Sunset "Sensational Succulents, a new coloring book from the queen of succulents Debra Lee Baldwin and illustrated by Laura Serra, has 75 images from Debra's books that have been transformed into line drawings, ready for you to color. The paper is thick, and unlike many coloring books which have so many lines that it's hard to do anything freehand, the outlines of the succulents give just enough room for us to take some artistic license in shading." —North Coast Journal "Fun mandalas made up of plants, and hours of restorative, creative fun." —San Diego Family Fun Magazine
