But, in reading the book, I laughed so much! Yes, the kids will enjoy the book's humor and all the fishes but the puns are hilarious! You will be laughing as you read this book to children. So although a children's book, I had my 24 year old daughter read it and she laughed! You will not be disappointed in this book. Buy it for the kids and enjoy it yourself! Great job!2 of 2 people found the following review helpful. Twenty thousand puns under the sea!By CHKandyWonderfully original story that is really written for all ages. If you are reading this to a child, odds are you will be challenged to explain the relentless punning. Guarantied to cause endless groaning and to put a smile on everyone's face!0 of 0 people found the following review helpful. Creative, Funny and Clever!By Mrs.D.This story is written with a touch of unusual humor. It is easy to read and follow the main characters. I was introduced to the Sharklock Bones series at one of the author's days. Since then I became a fan of the famous fish detective Sharklock and his sidekick Doctor Flotsam. John Leone has written a series of books, which entertain children and grownups. I enjoyed following his amusing characters, cleverly described in each book. This intriguing mystery story with many puns and jokes made me laugh and long for more. If you want to have fun reading with your child, you should read Sharklock Bones and his future mysteries. This is an entertaining book for any age!

"Sharklock Bones: Fish Tales" features the world famous fish detective and his trusty side-kick Dr. Flotsam. Join the fishy duo as they take on Devious Dolphin (also known as the Codfather). Next they help the famous General Robert Eel Lee (who rides a seahorse, of course) discover who is trying to sabotage the Sea Ville War Reenactment by using a giant hound to scare everyone. "Sharklock Bones" is full of puns, jokes, word plays and pictures guaranteed to bring laughs, chuckles and smiles to readers eight to eighty. Nonstop references to movies, songs, historic events and pop culture icons move the tales along while raising the young reader's interests. Written in a manner to encourage readers to interact or play roles, "Sharklock Bones" is the first in a series called "LaughLearn". John Leone lives in Deptford, New Jersey with his wife, Cheryl. He has written many short stories, newsletters and poems. This is his first children's book and is based on two stories he wrote for his grandson, also named John Leone.
