John L. Leone : Sharklock Bones: Reef Tails (Volume 10) before purchasing it in order to gage whether or not it would be worth my time, and all praised Sharklock Bones: Reef Tails (Volume 10):

This book is the tenth in the "Sharklock Bones Fish Detective" series. It features the team of Sharklock Bones and his trusty sidekick, Dr. Flotsam. This latest adventure involves a trip across the North Atlantic Ocean to determine what happened to Sharklock's brother, the world famous adventurer, Indiana Bones, who is in Fishtown Memorial Hospital.

About the AuthorJohn Leone started writing this series as a gift for his grandson, Christmas, 2011. There's now ten books in the series (as he had to cover all his grandchildren, children, wife, etc. etc.) The series has turned out to be quite popular, more so with grownups than the children they buy them for. Many of the puns and jokes are references to pop culture icons, new and old. All the books in the series are written in screenplay fashion to hopefully have children interact with others.
